

WESTPOLE'S GUIDE TO SUBLIMATION

what is sublimation?

Sublimation and manufacturing is the highest most professional premium quality service available for athletic, sports and branding apparel. It is a dying process used to dye the entirety of a piece of clothing.

what Garment do we use?

We take a white, 100% polyester garment and use a special dying process which transfers dye directly to the clothing using high temperature and pressure at a molecular level, which results in hugely vibrant colours with zero fading, so your design never comes out.

Can i customise it?

You can have unprecedented levels of customisation.

- ▶ Complex, all-over patterns and designs.
- ▶ As many colours as you want.
- ▶ Any number of logos.
- ▶ Individual Numbers.
- ▶ Individual Names.
- ▶ Gradients.

How can i show you what i want?

You don't have to be an artist to design a great kit! You can;

- ▶ Send us your hand-drawn designs.
- ▶ Simply tell us in an email what you want.
- ▶ Choose a design from our website and make edits.

What we get...

Hi,

We are a team of athletes and we are looking to have our apparels designed. We would like a Black dress, with cheetah prints across the back. We'd like our logo on the front. We would also like black and pale golden lines on the sleeves and front. Is this something you can do?
